

INFECTION CONTROL

for people
& pets

World Antimicrobial Awareness Week

18th - 24th November 2023

**“Preventing Antimicrobial
Resistance Together”**

How can we aim to reduce infectious diseases and limit the use of antimicrobials and antibiotics?

Prevention is better than cure

There are simple steps that can be taken in everyday life, which will help to prevent the transmission of bacteria

PREVENTION IS BETTER THAN CURE

Hygiene & your
pet

Use separate bowls and utensils

- Do wash your pet's bowls separately
- Do wash food and water bowls regularly
- Your pet may have licked something unpleasant
- Allowing your pet to lick your bowls may leave bacteria behind

Dispose of faeces responsibly

- Always pick up after your dog
- Always dispose of your pet's waste appropriately
- Your pet's waste may be harmful to you or other animals
- Do not leave waste bags for others to collect
